CR Series Insert
08/11

The Canon imageFORMULA CR-Series check transports convert paper checks and related small documents into electronic images, helping to decentralize payment processing from the first point of presentment to settlement. They can be used in a wide variety of applications, including teller and remote deposit / merchant capture, as well as utility and back-office capture, remittance processing, lockbox, and branch automation. They offer features such as high-speeds, compact footprints, and convenient easy use.
